# Project Name: **MyBoba Order Drink App**

Summary:

1. Create an Order Drink App for a boba store, allowing customers to browse and customize their drinks with different options such as sugar level, ice level, and toppings.
2. The app includes three main types of drinks: milk tea, fruit tea, and smoothie. All of them share the same features and customization options.
3. For smoothies, the amount of ice is fixed and cannot be changed.
4. At the end, users can review their selections, proceed to checkout, and place an order through the app.

The goal of this app is to improve customer convenience, reduce order errors, and enhance the overall efficiency of the store's ordering process.

Welcome to MyBoba! What would you like to drink today?

Black Milk Tea

Matcha Milk Tea

Oolong Milk Tea

Milk tea   Fruit tea   Smoothie

- Creating a class "**Drinks**" that has properties like name, size, sugar, ice, toppings, price.
- A class "**Milk Tea**", "**Fruit Tea**", and "**Smoothie**" in the bottom will inherit "**Drinks**".
